

Spring Cleaning Tips for the Busy Mom

Will you Batch or Room Clean?

Batch Cleaning - Clean a certain surface or item in each room. Will you clean all the ceiling fans in your house at once **or** will you clean **each room one at a time**?

Get Dust Off the Walls Easily

Whether you move your furniture away from the walls or not, the **Swiffer cloths** with handles on them are a great way to get most of the dust out of your house.

Less Items on Surfaces

www.HeidiNaturally.com

Do a walkthrough of your house and look at what is on the flat surfaces. Do you love each item that is displayed there? **Does it bring you joy?** The less items out on flat surfaces, the easier our houses will be to clean.

Wipe Your Main Surfaces

Now that you have less items sitting on the flat surfaces, it will be easier to move things and wipe them down. You can get as detailed or broad as you want here. You can use a **damp or dry cloth** for this step.

Pay Attention to Corners

Look up and dust out those corners with your tools. Look down and use your tools (a toothbrush works great here) to get the gunk out of the corners of each room. You will feel so much better about the room when you look in the corners and see that they are clear!
